SERIAL No. 6

From

The President Mysore City Municipality

To The Plague Commissioner in Mysore

(26)

Dated
Despatched } 17th February 99
Received

General No. 592 4920
No. FEB 21

Enclosure No.

Sir

I have the honour to submit herewith the marginally noted Compensation statements amounting to Rs 7730 for acquiring houses pronounced by the medical officer as unfit for human habitation in the Sanitary grounds in the Fort and other mohalas in the City of Mysore and to request that you will be good enough to move the Government to sanction the same.

Fort No	55	27	
do	11	68	
do	10	33	
	77	28	

2. A loan of Rs 77255 was sanctioned for opening out Congested parts of the City as per original estimate. Since then 3 other estimates were sanctioned viz one for Rs 40,573 in Government Proceedings no 7129-31 dated 9-12-98 for opening out

L 783-96

Best apart

Bestagari, Kowsabaragari and Ganig-gari in Lushkar mohala; and the other two for Rs 9642 in Government proceedings No 7560-20 / 3204-93 dated 21-12-98 for removing machinery in mandy mohala. Now nearly 70,000 Rs has been spent, leaving only a balance of Rs 47,255. Out of this balance again, a sum of Rs 24,909 was sanctioned for constructing drains, which will have now to be abandoned as you ordered that all available amount to be spent for opening out the Congested parts of Bestagari etc.

Thus you will see that the balance is hardly enough to meet the estimates already sanctioned. If it is still decided that the cost of acquiring the houses condemned by the Health Officer to be met out of the same amount, some of the estimates sanctioned will have to be abandoned.

It is unnecessary to bring to your notice that the works already sanctioned after your personal Inspection are important, but if it is still held that these should lie over, I request that you will kindly move the Government to sanction the estimates out of the loan or from the Plague Funds as you may consider proper.

I have the honour to be
Sir
your most obedient Servant.

for President

Inspection Notes of Mr. V. P. Madhava Rao, Plague Commissioner, and Surgeon Lieut.-Col. P. H. Benson, Senior Surgeon and Sanitary Commissioner with the Government of Mysore, in company with Mr. Standish Lee, Sanitary Engineer and Mr. H. Nanjundaraj Urs, Vice-President, Mysore City Municipality.

Mysore City, 3rd April 1898.

Places visited.	Remarks.
Late Durgaiya's tank, Devarajmohalla.	The Sanitary Engineer brought to notice that the tank had been in great part filled in with street sweepings. The Vice-President undertook to have the whole surface covered with a foot of fresh red earth.—Approved. House sweepings were ordered not to be thrown into the tank in future.
Slaughter house for goats and sheep.	The waste products are made to discharge into an open pit and when sufficiently consolidated, removed and sold. Adjoining the pit is the rubbish depot for the Mandimohalla and adjoining these are three disgustingly insanitary Municipal institutions, *viz.*, the slaughter house, offal pit and rubbish depot and on three sides of these are dwelling houses.
	The Vice-President was instructed to conduct the drainage to some distance from the slaughter house and to cover the daily collection with earth.
Rubbish Depot, Mandimohalla	The rubbish depot to be levelled and covered over with fresh earth and not to be used in future for the deposit of rubbish. The Sanitary Engineer to be requested through the Chief Engineer to submit plan and estimate for an improved slaughter house to be built farther out of the town on a site to be approved by the Sanitary Commissioner.
Subrayankere, Chamraj mohalla.	The sewage of the western extension now stagnates in the feeder of Subbarayankere and will be washed into it on the first shower of rain.
	The water in the tank is very foul, very like sewage and yet it is freely resorted to for washing clothes and for bathing. The Sanitary Engineer said that the scheme for diverting the sewage had been sanctioned, but the execution was deferred for want of constructive details. Chief Engineer to be requested kindly to expedite the commencement of the work which is of great importance to this thickly-peopled locality.
	Vice-President instructed to reduce the water spread and to level the inequalities of the bed. The land reclaimed to be planted out.
	The suggestion noted in the Inspection Notes of the 3rd March 1898 to have a bathing place built with brick and chunam with concrete floor was approved.
Doddakere improvement.	The Sanitary Engineer brought to notice that the Bennehardenahalli feeder was being closed and that the Doddakere will not fill in future years.

Places visited.	Remarks.
	The Sanitary Commissioner was of opinion that the present season and the absence of His Highness from the capital were favorable for carrying out the proposed reduction of water spread and the reclamation and planting out of the bed. Chief Engineer to be asked to kindly expedite the starting of this very important work, as unless planted out or cultivated the exposed bed of the tank is most likely to add to the insanitary condition of Ittigegud which immediately adjoins the Summer Palace.
Opening out lanes in the town.	It was mentioned that the loan of Rs. 1,20,000 asked for from Government would be sanctioned as soon as the estimates submitted by the Municipality, which are not forthcoming, could be traced. The Vice-President said that duplicates had been submitted. Government to be urged for favor of early orders.

List of works in progress in the Mysore City in connection with Plague preventive measures:—
